

# MixItUp Tenant Redeem Reference Sheet

Channel Points -> Bingo Card | Public Bingo Operator Quick Guide

**Before setup:** Confirm tenant slug mapping in Owner panel, rotate a tenant redeem key for that slug, and ensure a bingo round is open or running for that tenant.

**Secret key safety:** Contact Bingo Owner For Secret Key and paste only that private key value after Bearer. Do not share it publicly.

## Common Request Template (All Slugs)

### Method

POST

### Headers

Authorization: Bearer REPLACE\_WITH\_TENANT\_REDEEM\_KEY  
Contact Bingo Owner For Secret Key  
Do not share this key publicly.  
Content-Type: application/json

Bearer REPLACE\_WITH\_TENANT\_REDEEM\_KEY\_LIVEBINGO\_01  
 Contact Bingo Owner For Secret Key  
 Do not share this key publicly.

**BLOCK 3: livebingo-02****Overlay URL**

`https://public-overlay.custom-overlays.com/?tenant=livebingo-02&api=https://public-control.custom-overlays.com`

**Bingo Controller URL**

`https://public-controller.custom-overlays.com/?tenant=livebingo-02&api=https://public-control.custom-overlays.com`

**Web Request URL**

`https://public-control.custom-overlays.com/api/t/livebingo-02/internal/redeem/join`

**Authorization Value**

Bearer REPLACE\_WITH\_TENANT\_REDEEM\_KEY\_LIVEBINGO\_02  
 Contact Bingo Owner For Secret Key  
 Do not share this key publicly.

**MixItUp Response Mapping**

Response Processing Type: JSON to Special Identifiers

viewerUrl -> bingoviewurl  
 error -> bingoerror  
 message -> bingoessage

**Chat Message Action**

Send as Streamer: On  
 Whisper: On  
 Whisper User: Leave blank  
 Chat Message: @\$userdisplayname Your Bingo card: \$bingoviewurl

**First-Time Setup Steps**

1. Rotate and copy tenant redeem key from Owner panel for the exact slug.
2. Open MixItUp Desktop and create/open your Bingo Card reward command.

3. Add a Web Request action and paste the matching tenant block.
4. Replace only the Bearer key placeholder. Contact Bingo Owner For Secret Key if you do not have it.
5. Add the Chat Message action values from this sheet.
6. Start a round in Bingo Control for the same tenant.
7. Redeem once and verify a viewer URL is delivered.

## Quick Troubleshooting

**join\_not\_available:** No active round is open/running for that tenant.

**invalid\_tenant\_redeem\_auth / invalid\_internal\_secret:** Key is missing, wrong, or from another tenant.

**redeem\_id\_conflict:** Same redemptionId reused with a different twitchUserId.

**Redeems fail after key rotation:** Update MixItUp with newest key immediately.

**Viewer says invite token missing:** Open the full viewerUrl returned by the API response.

Tip: If slug mapping is wrong, redeem may hit the wrong tenant context or fail unexpectedly. Verify Broadcaster -> Slug mapping in Owner panel Tenant Overview.
